# GREENPATH PROGRAM REPORT

## Introduction

The Greenpath International, Inc. verification report provides the aggregate data reflecting consumer engagement activities during the 2015 calendar year across four programs: Mental Health Rehabilitation, (b) Counseling and Education Programs [anger management and domestic violence], (c) Substance Use and Addiction Program, and (d) Cooperative Agreements to Benefit Homeless Individuals. This program report illustrates frequencies and trends across these four programs within domains that can be used to assess historical performance and inform forthcoming program evaluation and development activities. These domains include:

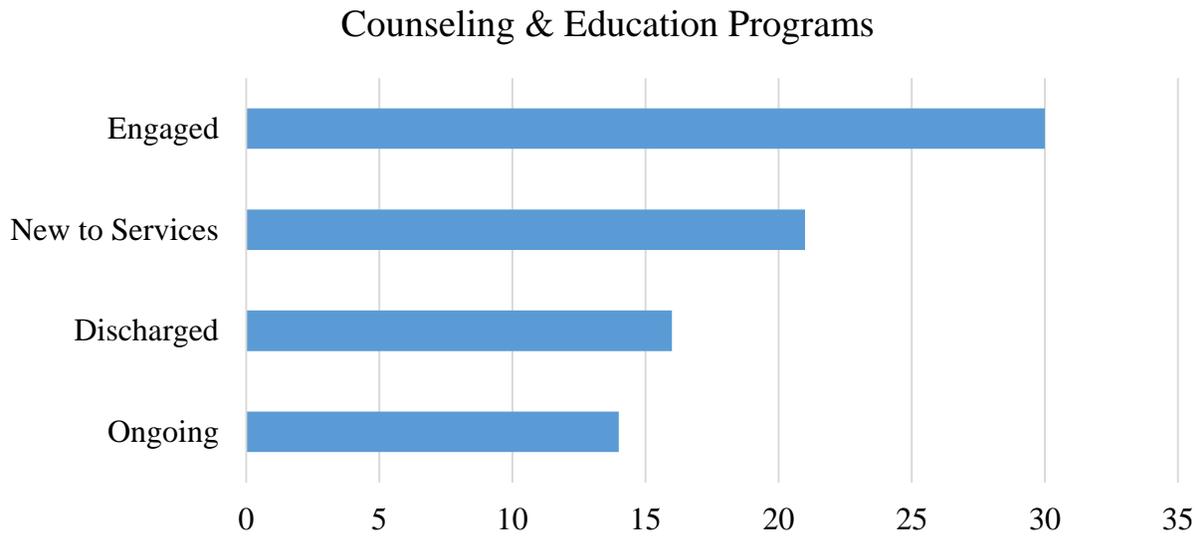

- Consumer engagement
- Intake/enrollment
- Discharge
- Demographic composite

**SECTION 1: MENTAL HEALTH REHABILITATION PROGRAMS**

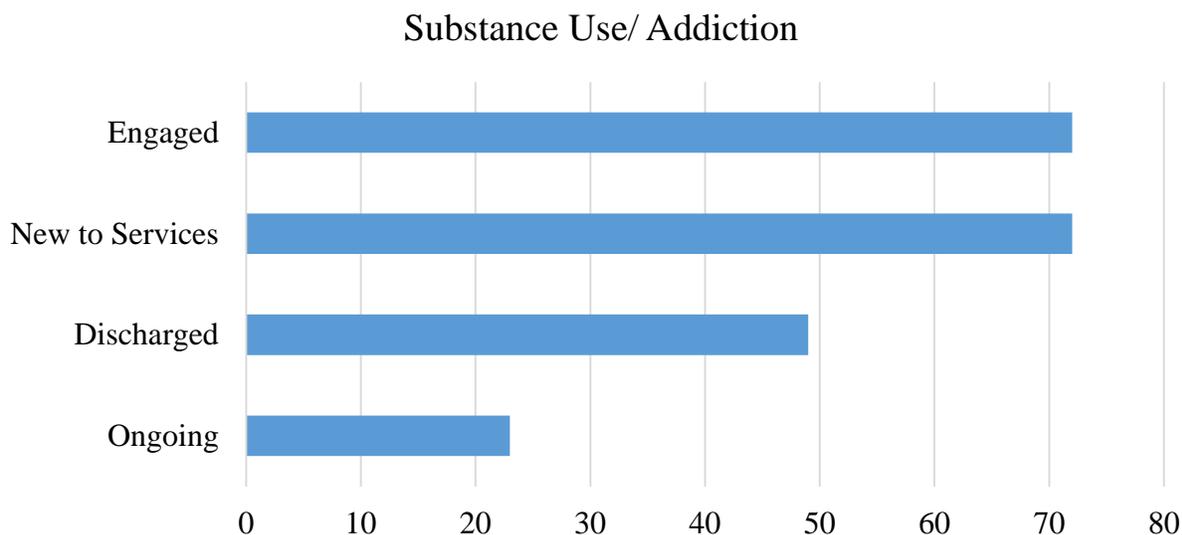

- **Number of Consumers Engaged in 2015:** The Greenpath MHR program engaged 42 unique consumers through the program during the 2015 calendar year.
- **Number of New Intakes in 2015:** Of the 42 consumers engaged during 2015, 42 (100%) were documented as receiving intake into the MHR program.
- **Number of Consumer Discharges in 2015:** Of the 42 consumers engaged during 2015, 7 (17%) were discharged and 35 (83%) are currently active and receiving ongoing services.
- **Demographic Composite:** Although young adults and older adults received services through the MHR program, during 2015 consumers tended to be children and adolescents with 29 (69%) unique consumers being 18 years or younger. Additionally, the greatest proportion of 2015 consumers who received services in in the MHR program reported black ethnic identities ( $n = 33$ ; 78%) 2015 with white ( $n = 8$ ; 19%) and Latino ( $n = 1$ ; 2%) individuals represented to a lesser degree. Finally, of consumers whose gender data was available (41 of 42) services were equally distributed across boys/men ( $n = 21$ ; 51%) and girls/women ( $n = 20 = 49%$ ). Taken together, the typical demographic composite of consumers in the MHR program is an adolescent boy or girl who reports a black ethnic identity. By contrast, service provision young and older adults who report white and Latino ethnic identities appeared to access services to a lesser degree.

**SECTION 2: COUNSELING & EDUCATION PROGRAMS**

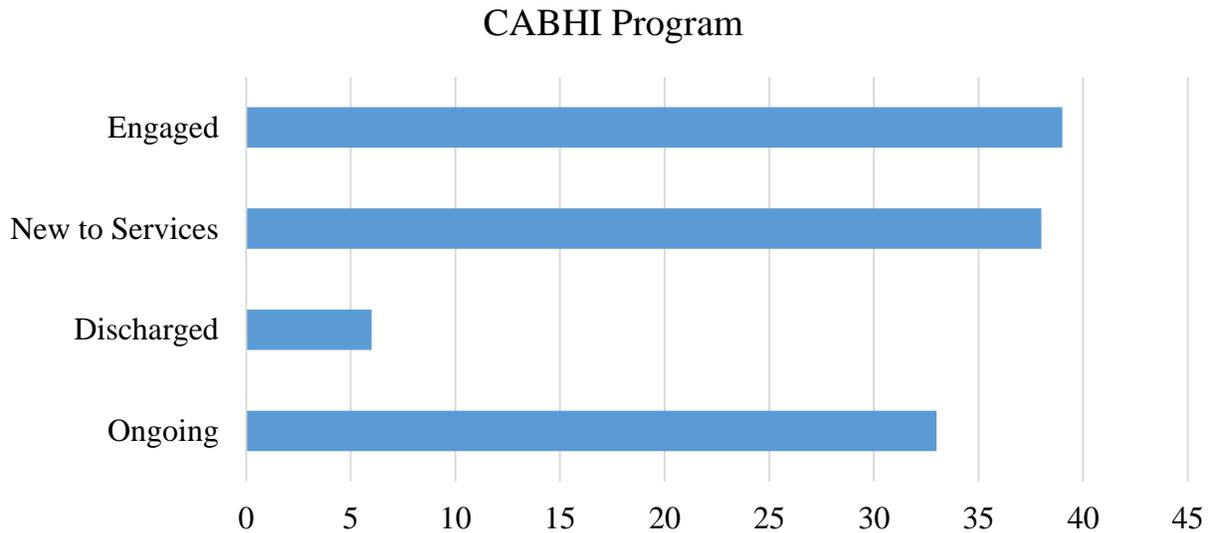

- **Number of Consumers Engaged in 2015:** The Greenpath Anger Management and Domestic Violence counseling and education programs engaged 30 unique consumers through the program during the 2015 calendar year.
- **Number of New Intakes in 2015:** Of the 30 consumers engaged during 2015, 21 (70%) were documented as receiving intake into the counseling and educational programs.
- **Number of Consumer Discharges in 2015:** Of the 30 consumers engaged during 2015, 16 (53%) were discharged and 14 (47%) are currently active and receiving ongoing services.
- **Demographic Composite:** Among the 30 unique consumers that received services through the counseling and education programs, the preponderance were young adults ( $n = 23$ ; 76%) ages 21 through 40. These consumers tended to report black ethnic identities ( $n = 26$ ; 87%) with only 4 individuals (13%) reporting white ethnic identities. Finally, consumers tended to be men ( $n = 21$ ; 70%) with women receiving services to a lesser degree ( $n = 9$ ; 30%). Taken together, the typical demographic composite of consumers in the Counseling and Education Programs were men who were young adults and reporting a black ethnic identity. By contrast, women and individuals of non-black ethnic identity accessed services to a lesser degree.

### SECTION 3: SUBSTANCE USE/ADDICTION PROGRAM

- **Number of Consumers Engaged in 2015:** The Greenpath Substance Use and Addiction Program engaged 72 unique consumers through the program during the 2015 calendar year.
- **Number of New Intakes in 2015:** Of the 72 consumers engaged during 2015, 72 (100%) were documented as receiving intake into the substance use/addiction program.
- **Number of Consumer Discharges in 2015:** Of the 72 consumers engaged during 2015, 49 (68%) were discharged and 23 (32%) are currently active and receiving ongoing services.
- **Demographic Composite:** Among the 72 unique consumers that received services through the substance use/addiction program, the majority were young adults ( $n = 52$ ; 72%) ages 18 through 40. These consumers tended to report black ethnic identities ( $n = 43$ ; 60%) with individuals reporting white ( $n = 24$ ; 33%), Latino ( $n = 2$ ; 3%), and other ( $n = 3$ ; 4%) ethnic identities. Consumers also tended to be men ( $n = 59$ ; 82%) with women receiving services to a lesser degree ( $n = 13$ ; 18%). Taken together, the typical demographic composite of consumers in the substance use/addictions program were men who were young adults and reporting a black ethnic identity. By contrast, women and individuals of non-black ethnic identity accessed services to a lesser degree.

**SECTION 4: COOPERATIVE AGREEMENTS TO BENEFIT HOMELESS INDIVIDUALS**

- **Number of Consumers Engaged in 2015:** The Greenpath Cooperative Agreements to Benefit Homeless Individuals for States Supplement (CABHI) Program engaged 39 unique consumers through the program during the 2015 calendar year.
- **Number of New Intakes in 2015:** Of the 39 consumers engaged during 2015, 38 (97%) were documented as receiving intake into the CABHI program.
- **Number of Consumer Discharges in 2015:** Of the 39 consumers engaged during 2015, 6 (15%) were discharged and 33 (85%) are currently active and receiving ongoing services.
- **Demographic Composite:** Among the 39 unique consumers that received services through the CABHI program, all were adults ages 21 through 66. These consumers tended to report black ethnic identities ( $n = 33$ ; 84%) and white ( $n = 6$ ; 16%) ethnic identities. Consumers also tended to be men ( $n = 22$ ; 56%) more than women ( $n = 17$ ; 44%), but only to a slightly greater frequency. Taken together, the typical demographic composite of consumers in the CABHI program were men who were in their adults year who and reporting a black ethnic identity. By contrast, women and individuals of non-black ethnic identity accessed services to a lesser degree.

## GREENPATH PROGRAM REPORT

### SUMMARY STATEMENT

- During the 2015 reporting year, Greenpath International, Inc. has engaged 183 consumers across the four service packages.
- Among these 183 engaged consumers, 174 (95%) were new to services as indicated by completing their intake process during the 2015 reporting year.
- Across all programs 78 (43%) were designated with discharged status and 105 (57%) remain currently active at the time of reporting.
- Evaluation of demographic composites across programs indicate that Greenpath International, Inc. has provided services to a great number of adult men who are ethnic minorities.
- The results of this program review have promising implications for the importance of the Greenpath International, Inc. programs within the greater New Orleans area. The demographic populations represented by consumers who have been engaged and served 2015 represent cross-sections of cultural identity that are vulnerable to psychosocial impairment, especially when considering the co-occurring nature of risk factors such as mental health diagnoses, substance use diagnoses, and homelessness.

### RECOMMENDATIONS

During the 2016 service year, stakeholders and policy planning agents affiliated with Greenpath International, Inc. may consider the potential benefit of the following recommendations:

- **Consumer Engagement and Service Expansion**
  - Increased outreach to increase enrollment in service programs so that they are closer to capacity thresholds
  - Develop and implement a campaign that improves community partner awareness of available services to increase consumer engagement
  - Enhance relationships with existing referral sources through strategic, but reasonable contact efforts
- **Service Enhancement**
  - Evaluate current strategies for consumer retention across programs and identify provider-originated strategies to promote sustained engagement and successful discharge from services
  - Conduct interviews with consumers to identify potential areas for service enhancement
  - Consult with similar programs to identify strategies that they have implemented to maximize program outcomes and productivity
